Overseas Exchange Programme in Canada

Professors who have made a positive impact on me

Advice for juniors
Memorable moments or experiences in NTU?

My overseas exchange at McMaster University in Canada was definitely a memorable one.

I think it was one of the breakthrough moments in my life where I learnt to be independent. It was also the first time I experienced winter. I dived into a culture I was unfamiliar with, enjoying food such as poutine and getting bagels for breakfast, thanking bus drivers for fetching me to my destination and greeting people by asking how their day was. It is worthwhile knowing how different life is from Singapore and how important it is to know the cultural differences as they can shape our perspectives differently.

Anyone you would like to thank?

I would like to thank my FYP mentor, Mr Oh Hong Lye.

He has been a mentor, supervisor and friend throughout my final year in university. His personal advice and encouragement has better prepared me to face the challenges in the working world.

What’s next?

I will be working in ST Electronics (InfoSecurity) doing cybersecurity work to help local businesses and public infrastructure be equipped with the necessary protection against possible cyber attacks.

Any advice for juniors?

Have a goal of what you want to achieve in NTU while taking time to actively discover more of yourself. NTU is a great environment to find like-minded individuals to compete, collaborate and upgrade yourself!

Be bold, be courageous and have fun!
